

Breg Polar Care Cube

\$185/including pad

*Additional pads sold separately for
\$60/each

The Breg Polar Care Cube Cold Therapy System is simple and reliable. It's easy to use, compact design makes it great for clinic, hospital, and home use. With the addition of ice and water, you can enjoy 6-8 hours of effortless cold therapy. The unit works by pulling ice water from the cooler chamber, mixing it with warmed water from the cuff, and circulating it through the cuff continuously. The unit is portable and plugs directly into any AC outlet for continuous cold therapy use.

For the Breg Polar Care cube, we recommend that you fill from the tap and freeze 3-8oz plastic water or sports drink bottles after removing the labels. These bottles can be placed inside the cooler instead of ice cubes. These bottles stay cold as long as or even longer than ice cubes and minimize the maintenance required to keep your cooler unit cold. Proper use requires a barrier between the pad and the patient's skin.

Most insurances consider cold therapy a luxury item, therefore Beacon Orthopaedics & Sports Medicine has chosen to make these self-pay items. You must pay the full cost at the time the item is provided to you. These items are subject to in stock availability and it is highly suggested they are purchased prior to surgery.

These items are not returnable after they are purchased, except in the case of a warranty defect. If a manufacture defect or warranty issue occurs within a six-month period after purchase, you can exchange it for the exact same item. Please contact the DME office where you purchased the item for assistance with this even exchange.

Please contact a Beacon Orthopaedics & Sports Medicine DME office directly to purchase this item.

Precaution: It is important to exercise caution when using any cold therapy product, including ones you did not purchase from Beacon Orthopaedics & Sports Medicine. If you have any circulatory conditions like Peripheral Vascular Disease (PVD) or Reynaud's Disease, or if you are diabetic, please consult with your doctor about specific precautions you should take when using cold therapy products.

Breg Polar Care Wave

\$350/including body part specific pad

*Additional pads sold separately for
\$100/each

Polar Care Wave combines motorized cold therapy with active compression in a simple and compact system, making it ideal for facility and home use. Polar Care Wave is easily transported from the hospital, physical therapy clinic or athletic training room to the patient's home, extending the benefits of cold and compression. Polar Care Wave is designed to reduce pain and edema to optimize patient recovery. Motorized cold therapy and compression devices, like Polar Care Wave, have also been shown to decrease narcotic use post-operatively.

For the Breg Polar Care Wave, we recommend that you fill from the tap and freeze 3-8oz plastic water or sports drink bottles after removing the labels. These bottles can be placed inside the cooler instead of ice cubes. These bottles stay cold as long as or even longer than ice cubes and minimize the maintenance required to keep your cooler unit cold. Proper use requires a barrier between the pad and the patient's skin.
